
SCIENCE EDUCATION

Formerly GENERAL SCIENCE QUARTERLY

THE OFFICIAL JOURNAL OF

Council for Elementary Science International

Copyright, 1963, by SCIENCE EDUCATION, INCORPORATED

EDITOR

CLARENCE M. PRUITT

*University of Tampa
Tampa, Florida*

VOLUME 47—NUMBERS 1 TO 5

FEBRUARY—DECEMBER, 1963

SCIENCE EDUCATION, INCORPORATED

525 West 120 Street
New York City

Published
February, March, April, October, and December
1963

BOYD PRINTING CO., INC.
ALBANY, N. Y.

INDEX TO VOLUME 47

ARTICLES

- Accent on Aerospace: New Motivations in Elementary Science, M. L. Story, 200-201.
- Accent on Thinking Through Curriculum Revision, Helen McCall Tewes, 175-178.
- ACE Scores as a Possible Means of Predicting Success in General College Physics Courses, Glenn F. Powers and Paul Witherspoon, 416.
- Analysis of Some Prominent Viewpoints on Teaching Elementary School Science, An, Eugene H. Smith, 188-193.
- Appraisal of Various American Colleges as Indicated by Number of Women Graduates Listed in *Who's Who of American Women*, Arthur E. Traxler, 439-447.
- Attempts to Improve High School Physics Education, Oscar L. Brawer, 372-376.
- Attitude Changes on Fallout and Race Associated with Special Instruction in Biology, Jerry B. Davis, 178-183.
- Call Him Teacher, Robert D. MacCurdy, 27-30.
- Challenge of Science Teaching Today and Tomorrow, Abraham S. Fischler, 348-353.
- Chemists as College Presidents, Will S. DeLoach and Opey Dew Jeanes, 353-355.
- Children's Understandings of Natural Phenomena, Donald Inbody, 270-278.
- Clarence Eugene Baer, Clarence M. Pruitt, 417-425.
- Comparative Study of Student Self-Ratings on the Influence of Inspirational Teachers in Science and Mathematics in the Development of Intellectual Curiosity, Persistence, and a Questioning Attitude, A, Kenneth E. Anderson, 429-437.
- Comparison of Four Techniques of Programming Algebra, A, Peter A. Hountras and Frank P. Belcastro, 388-393.
- Comparison of the Science Achievement of Sixth Grade Pupils Instructed by Regular Classroom and Special Science Teachers, A, Louis T. DiLorenzo and Joseph W. Halliwell, 202-205.
- Coordinating the Military and Civilian Space-Age Education Programs for Youth, Russell N. Cassel, 393-396.
- Creative Expression in Elementary Science, Ruth Shapton, 309-312.
- Criteria for a Special Methods Course in Biological Science Education for New Jersey Secondary School Science Teachers, Frank X. Suttman, 89-97.
- Critical Thinking and the Scientific Intangibles, Paul M. Smith, Jr., 405-408.
- Cultural Science Menace, B. Clifford Hendricks, 87-88.
- Decentralization as a Method of Optimum Utilization of Educational Motion Picture Materials in Physical Science Classes, Glenn F. Powers and Harry P. Zimmerman, 454-455.
- Demise of Council for Research in Education, Clarence M. Pruitt, 428-429.
- Developing Generalizations in Elementary Science, John Gabriel Navarra, 245-250.
- Development of a Measure of Conservation Attitudes, Kenneth H. Hoover and Richard E. Schutz, 63-68.
- Development of a Science Course for Elementary Teachers: A Cyclic Process, the, Laviel L. Henderson, Sr., 402-404.
- Dictionary of Testing, A, Benjamin J. Novak, 291-298.
- Discussion of Papers By Professors Atkins and Karplus, Millie Almy, 173-174.
- Do Science Institutes Satisfy Teacher Objectives? David S. Sarnar and Neal R. Edmunds, 31-33.
- Educational Process and Programmed Instruction, The, Kenneth E. Anderson and Allen Jack Edwards, 21-27.
- Effects of Rapid Changes in Science Upon Children, Beatrice J. Hurley, 168-172.
- Effects of Teaching with Science Articles, Jack H. Robinson, 73-83.
- Elementary Science and the Present Ferment, John Gabriel Navarra, 241-245.
- Ellsworth Scott Obourn, Clarence M. Pruitt, 1-13.
- Ephraim Laurence Palmer, Clarence M. Pruitt, 209-220.
- Evaluation as an Integral Part of a Summer Science Program for Talented High School Students, Margaret Charters Lyon, 377-382.
- Evaluation of CBA Chemistry for High School Students, John J. Montean, Ruth C. Cope, and Royce Williams, 35-43.
- Factor Analysis of Conservation Attitudes, A, Kenneth H. Hoover and Richard E. Schutz, 54-63.
- Factors Related to Competence in Science of Prospective Elementary Teachers, Horace W. Uselton, Joseph C. Bledsoe, and Charles L. Koelsche, 506-508.
- Ferdinand Atherton Riedel, Clarence M. Pruitt, 105-108.
- Field Study as a Technique in Elementary School Science, A, William D. Perkins, 485-489.
- Flask Projection, The, Arthur A. Delaney, 207-208.
- Guidelines and the Institution, The, H. Seymour Fowler, 456-460.
- Have You Tried a Program Yet?, Don Nasca, 68-72.
- High School and College Chemistry Teaching: An Area of Needed Research, Charles H. Heimler, 99-101.
- How Can a Binary Computer Simulate the Process of Reasoning? Edmond P. Odescalchi, 472-475.
- How to Make More Scientists, Morris Goran, 359-361.
- Hubert Melbourne Evans, Clarence M. Pruitt, 313-318.

- Instrument for Pre- and Post-Project Inventories of Teaching Difficulties in Elementary Science, An, Peter C. Gega, 197-200.
- Issues and Problems in Elementary Science in a Changing World, Katherine E. Hill, 109-113.
- Issues Raised in a Review of Research in Elementary Science, John Gabriel Navarra, 236-241.
- James Warren Gebhart, Clarence M. Pruitt, 426-428.
- Let's Start Teaching Science, Marvin Martin, 253-255.
- Measured Differences in a Group Development Situation Between Students With and Without Training in Non-Identification, Thomas M. Weiss, 448-452.
- Mechanics of Organization in Introductory Zoology Courses in State Universities and Provisions for the "Gifted" Students, Raymond E. Henzlik, 462-468.
- Need for an Activity Centered Science Program, The, Jerry L. Norton, 285-291.
- New Approach to the Training of Science Teachers: An Institute to Develop Techniques of Research for High School Teachers, A, David S. Sarner, 33-34.
- New Techniques in Teaching About Insects, Charles W. Mohler, 84-87.
- Non-Creative Practices in Art Education, Kenneth E. Anderson, 437-439.
- Objective Study for the Bases of Selecting an Eighth Grade General Science Textbook, An, Joseph A. Rammel, 258-264.
- Obourn—Pruitt Correspondence, 15-18.
- Oral Science Vocabulary of Kindergarten Children, The, Clifford J. Kolson, George C. Jeffers, and Paul H. Lamb, 408-415.
- Outdoor Education in Oregon, Irene Hollenbeck, 113-121.
- Perception of Authority in Relation to Open and Closed Belief Systems, C. Gratton Kemp, 482-484.
- $P_4=T_4$, Phyllis S. Busch, 474-475.
- Preparation of Teachers to Teach Elementary Science, The, Bernard E. Michals, 122-132.
- President's Report to NARST—1962-63, Ellsworth S. Obourn, 18-20.
- Principals' Role in the Elementary Science Program, The, Paul F. Ploutz, 250-253.
- Programs of Council for Elementary Science International, 193-197.
- Proposals for Improvement of Science Teaching in New Jersey Elementary Schools, Evan C. Richardson, 299-303.
- Proposed Earth and Space Science Course for High School Students, A, Russell N. Cassel, 102-104.
- Ranger III Satellite, Danny Joe Collins, 468-472.
- Reactions of Science Educators to Certain Published Science Education Findings, Edward K. Weaver, 44-53.
- Reading Method and an Activity Method in Elementary Science Instruction, A, Regan Carpenter, 256-258.
- Realistic and Hypothetical Models in the Teaching of Elementary Genetics, Henry Winthrop, 355-359.
- Recent Advances in Medical Science, J. L. Arbogast, 162-167.
- Relationship of Certain Science Concepts to Mental Ability and Learning of First Grade Children, A, Edward K. Weaver and Sara Gannoway Coleman, 490-494.
- Relationship Between Elementary School Student Teachers' Science Abilities and Their Self Appraisals, The, Belle D. Sharefkin, 342-347.
- Replication of Study of Normative Grade Placement of Light Concepts, Gary R. Smith, 183-187.
- Results of a Study on Teaching General Science to Pupils in the Intermediate Grades, Harry E. Cressman, 304-308.
- Science Concepts: A Study of 'Sophisticated' Errors, James L. Kuethe, 361-364.
- Science Is Not Only for the Scientific, Barbara M. Zapatka, 98.
- Science Requirements for Elementary School Teachers in Colleges for Teacher Education, Paul C. Bryant, 475-482.
- Science Teacher as a Researcher, The, Margaret Kaeiser, 460-461.
- Scientific Literacy Begins in the Elementary School, Alma S. Wittlin, 331-342.
- Scientific Methodology—The Education for a Changing World, Arnold M. Lahti, 157-162.
- Selection and Evaluation of Physics and Chemistry Concepts to be Used in the Seventh and Eighth Grade Science Program, A, Sue Rowe Cantrell and Loren T. Caldwell, 264-270.
- "Sine Qua Non," Ellsworth S. Obourn, 13-14.
- Some Psychological Considerations in the Objectives and Design of an Elementary—School Science Program, David P. Ausbel, 278-284.
- Something Dangerously New in Physics Teaching, Oscar L. Brauer, 365, 372.
- Study Made in Hillsborough County Florida to Determine What Science to Teach in the Junior High School, N. Eldred Bingham, 226-236.
- Study of Pupil—Teacher Interaction in Planning Science Experiences, A, Joe Zaffaroni, 132-137.
- Study of the Relationship Between the Recorded and Observed Behavior of Children in an Urban Classroom, A, Clarence R. Traxler, 144-156.
- Summer High School Program for Academically Talented Students in Mathematics and Science, A, Milton L. Ferguson, 382-386.
- Test of Science Comprehension for Upper Elementary Grades, A, Clarence H. Nelson and John M. Mason, 319-330.
- Use of Audiovisual Materials in Elementary School Science, The, Pearl A. Nelson and Gaylen B. Kelley, 495-505.
- Use of Objective Tests in Teaching Science, The, Thomas A. Hutto, 386-388.
- Virginia's Beginning Science Teachers—1958-59, Arthur D. Barfield, 397-401.
- We Play Games in Science, Margaret Sweitzer, 205-206.
- Whither Mathematics Contest Winners?, Nura D. Turner, 452-454.

Working Cooperatively, Science Teachers, Scientists, and Science Educators Produce a Program Which Significantly Improves Achievement in Science in the Junior High Schools of Hillsborough County, Florida, N. Eldred Bingham, 220-226.

Working with Science in the Kindergarten, Louis T. Cox, Jr., 137-144.
